

The enemy is invisible.
It moves through the air, the water,
the crowd. But it leaves a trail.
If you know how to look...

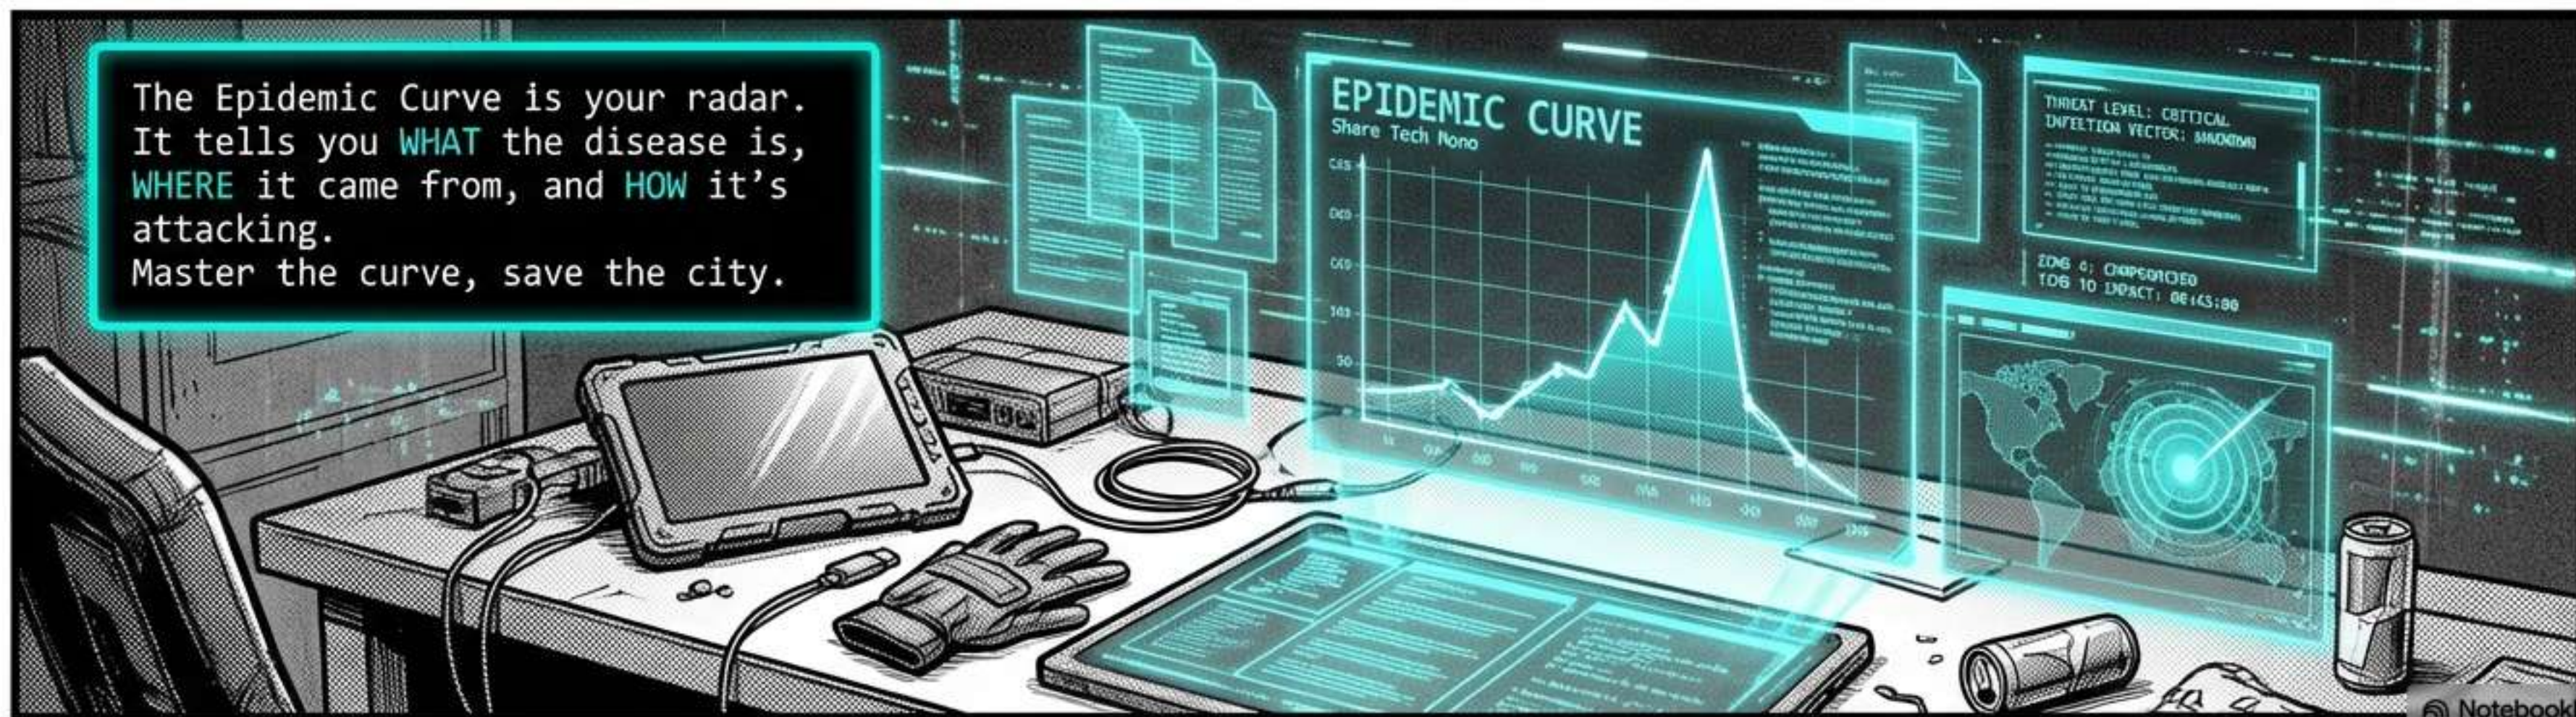

PROTOCOL: OUTBREAK

Pattern Recognition for Field Agents

GLOW!

CRACKLE!

INITIALIZING...

HUD SYSTEM INITIALIZING...

DATA STREAM: ACTIVE

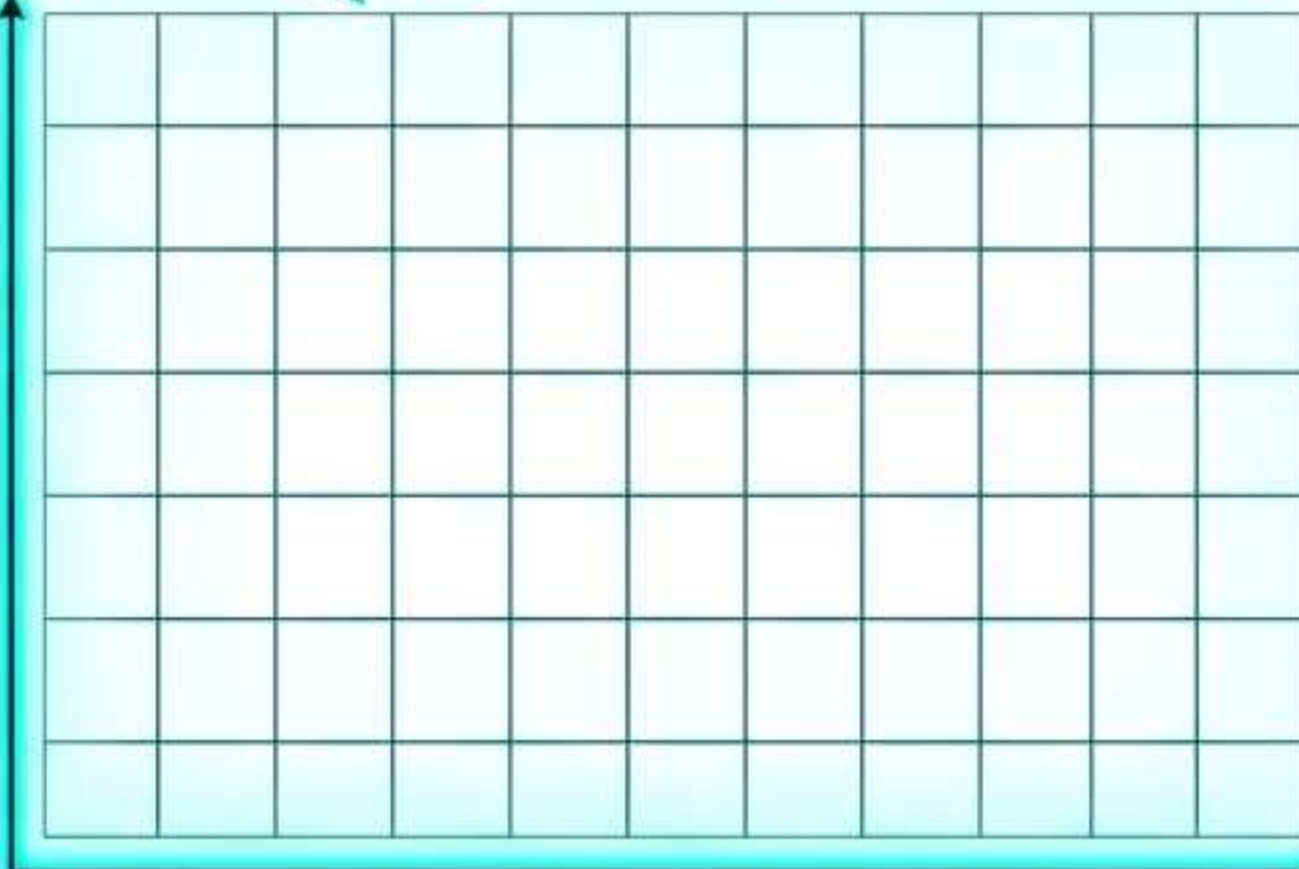

KATTO

STATUS: ACQUIRING TARGET...
THREAT LEVEL: ANALYZING
GRID RESOLUTION: HIGH

Horizontal is time.
Vertical is victims.
The shape they make
together? That's the
enemy's signature.

NUMBER OF CASES

TIME / DATE OF ONSET

The Body Count.
How many victims?
The height of the
bar equals the
severity of the strike.

The Timeline.
When did the soldiers
fall? We track this
by hour, day, or
week.

DATA VECTOR: ON
STATUS: ON
SHARE TSLT: ON
TIME RESOLTER: ON
POWERLINE ETENETORE: 1PPGEH

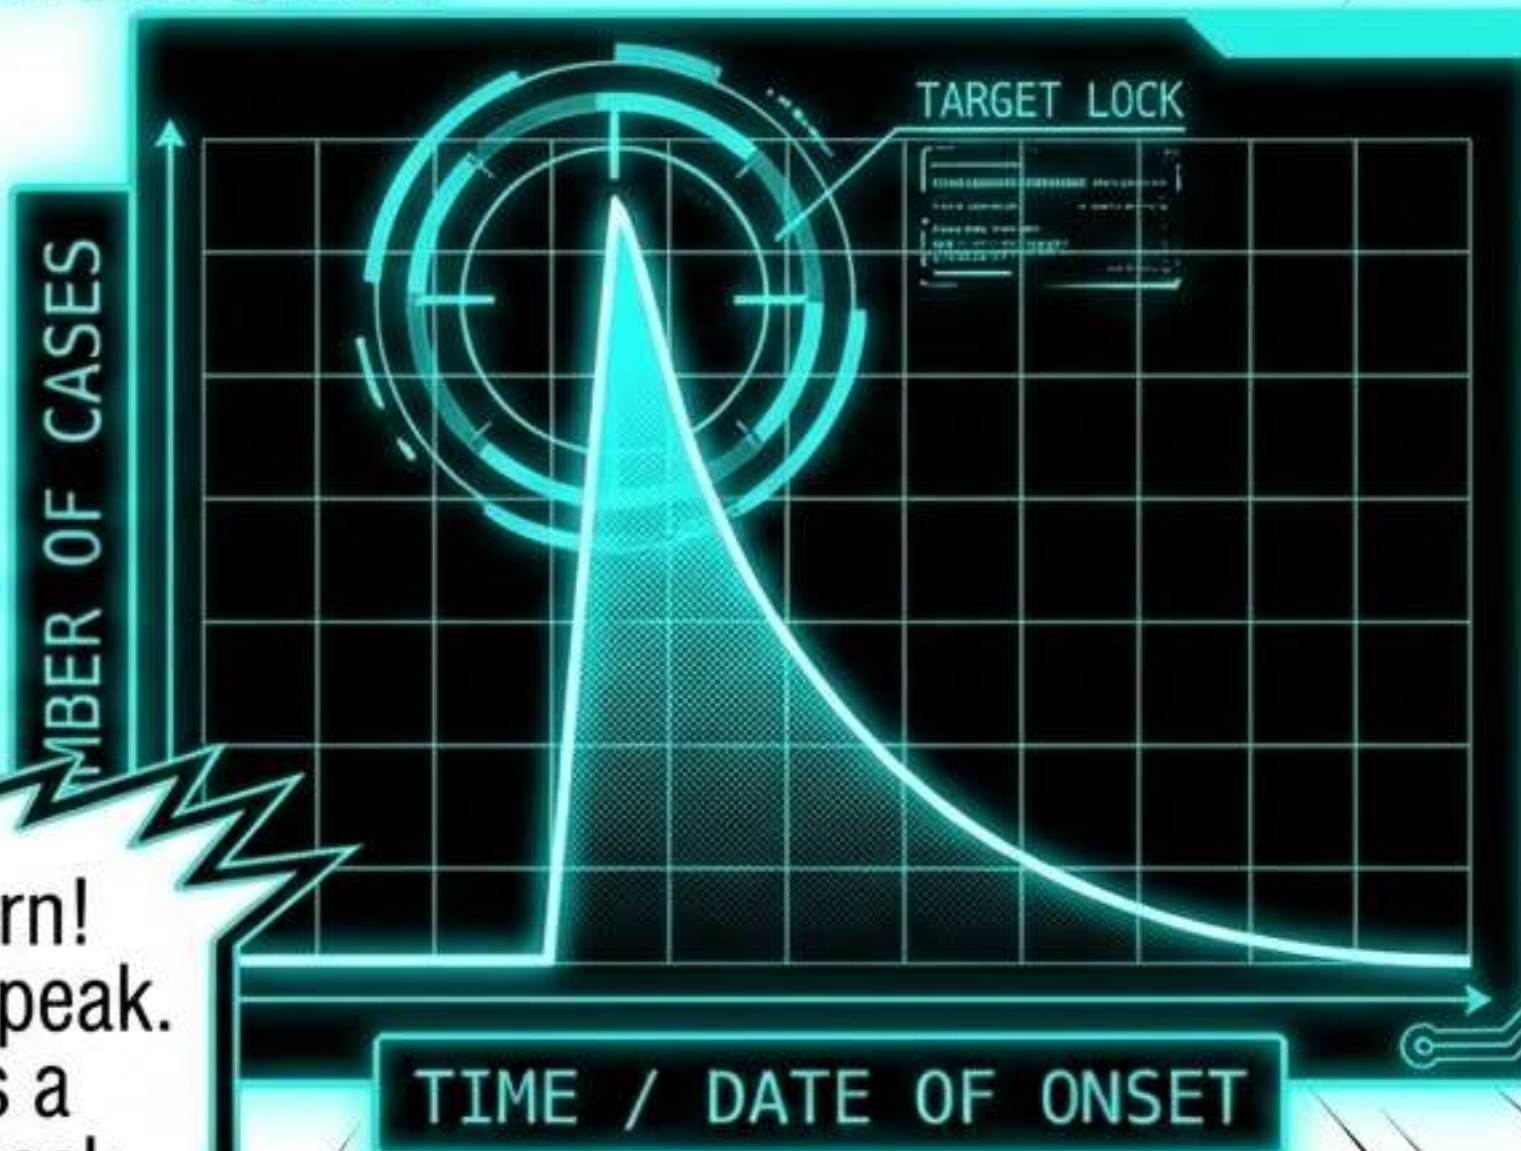

TACTIC RESOLUTION: ON

CLASS 1: POINT SOURCE

METAPHOR: THE SNIPER SHOT

Share Tech: Mono

Identify this pattern!
Sharp rise. Distinct peak.
Rapid fall. This is a
POINT SOURCE attack.

Share Tech Mono

EXPOSURE:
Short and simultaneous.
Everyone hit at once.

EXAMPLE:
A contaminated
potato salad at a
company picnic.

TACTICAL NOTE:
All cases occur within
one incubation period.

TACTIC RESOLUTION: ON

CLASS 2: CONTINUOUS COMMON SOURCE

METAPHOR: THE LEAKING PIPE

It's not dropping off, Rookie! The numbers are holding steady. This means the source is still active.

KAITO

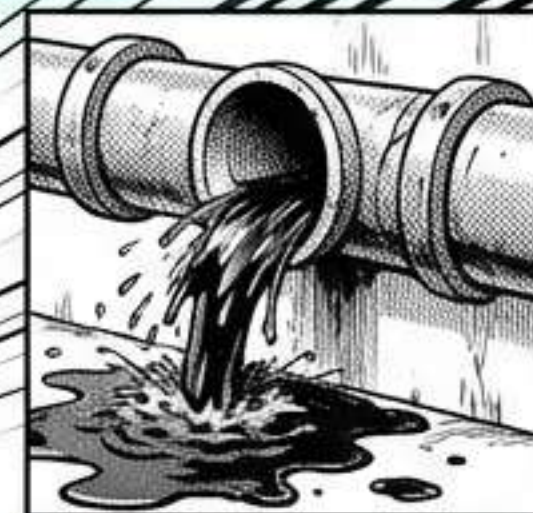

TACTICAL STATUS: THREAT LEVEL
CRITICAL / SOURCE: UNCONTAINED

NUMBER OF CASES

TIME / DATE OF ONSET

VISUAL METAPHOR:

VISUAL METAPHOR:
ACTIVE LEAK

Share Tech Mono

EXPOSURE:
Prolonged. The contamination is ongoing.

EXAMPLE:
A polluted public water pump that hasn't been shut off.

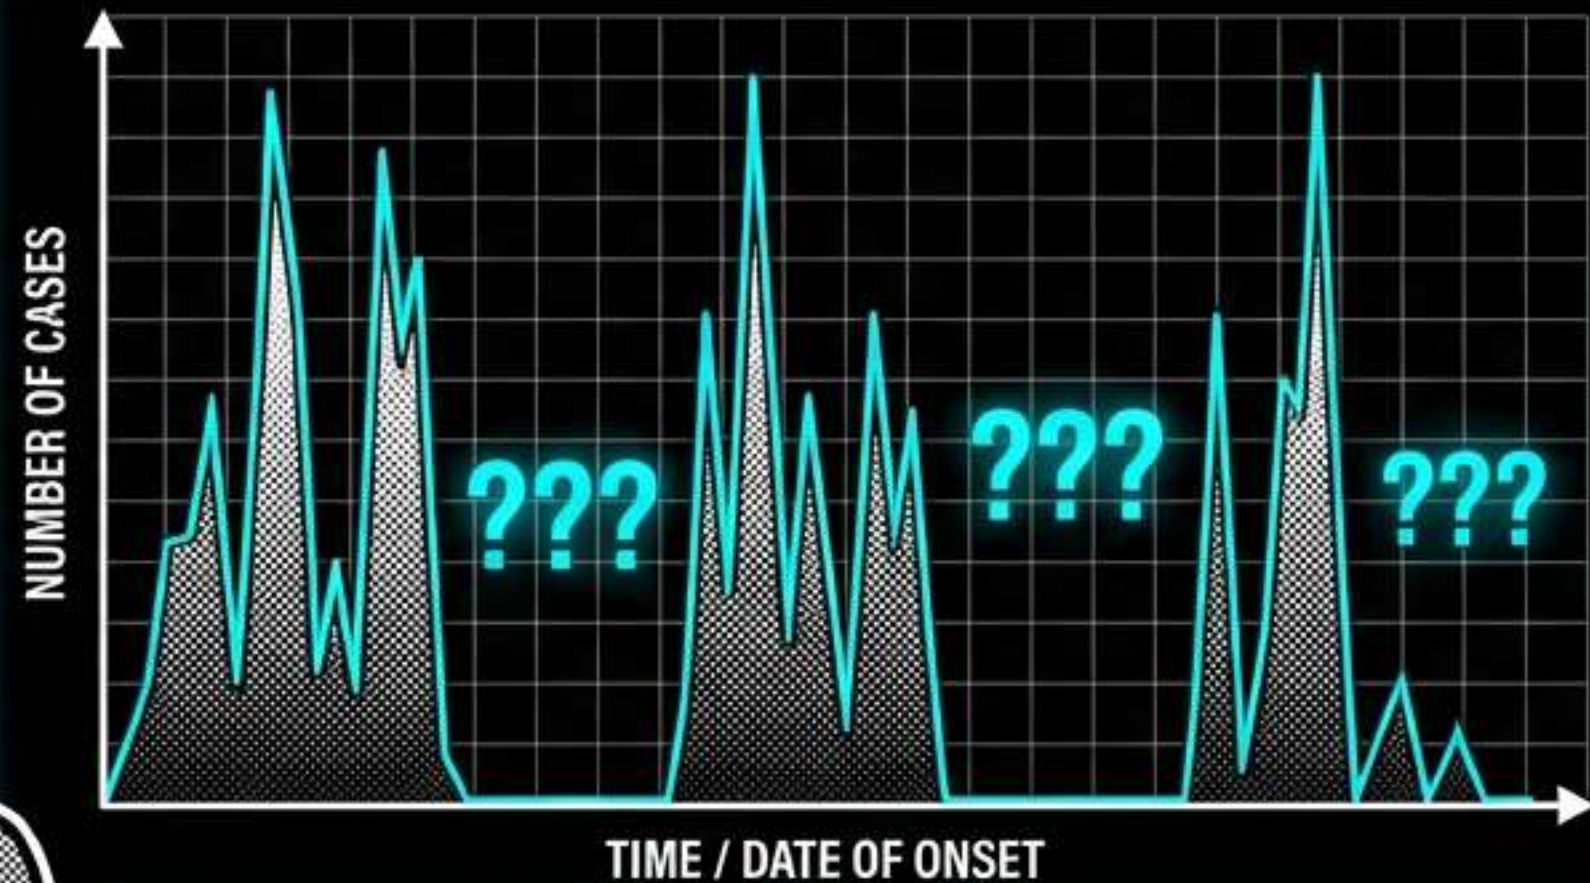

TACTICAL NOTE:
The curve will flatline (plateau) until the source is removed.

TACTIC RESOLUTION: ON

CLASS 3: INTERMITTENT COMMON SOURCE

METAPHOR: THE GUERRILLA STRIKE

Look at the gaps.
Attack, retreat, attack again.
The source isn't constant—
it operates at intervals.

EXPOSURE: Sporadic. Irregular timing.
EXAMPLE: A factory that only releases toxic fumes on specific production days.
TACTICAL NOTE: Harder to predict. Requires correlation with specific events or times.

CLASS 4: PROPAGATED

METAPHOR: THE WILDFIRE.

CODE RED.

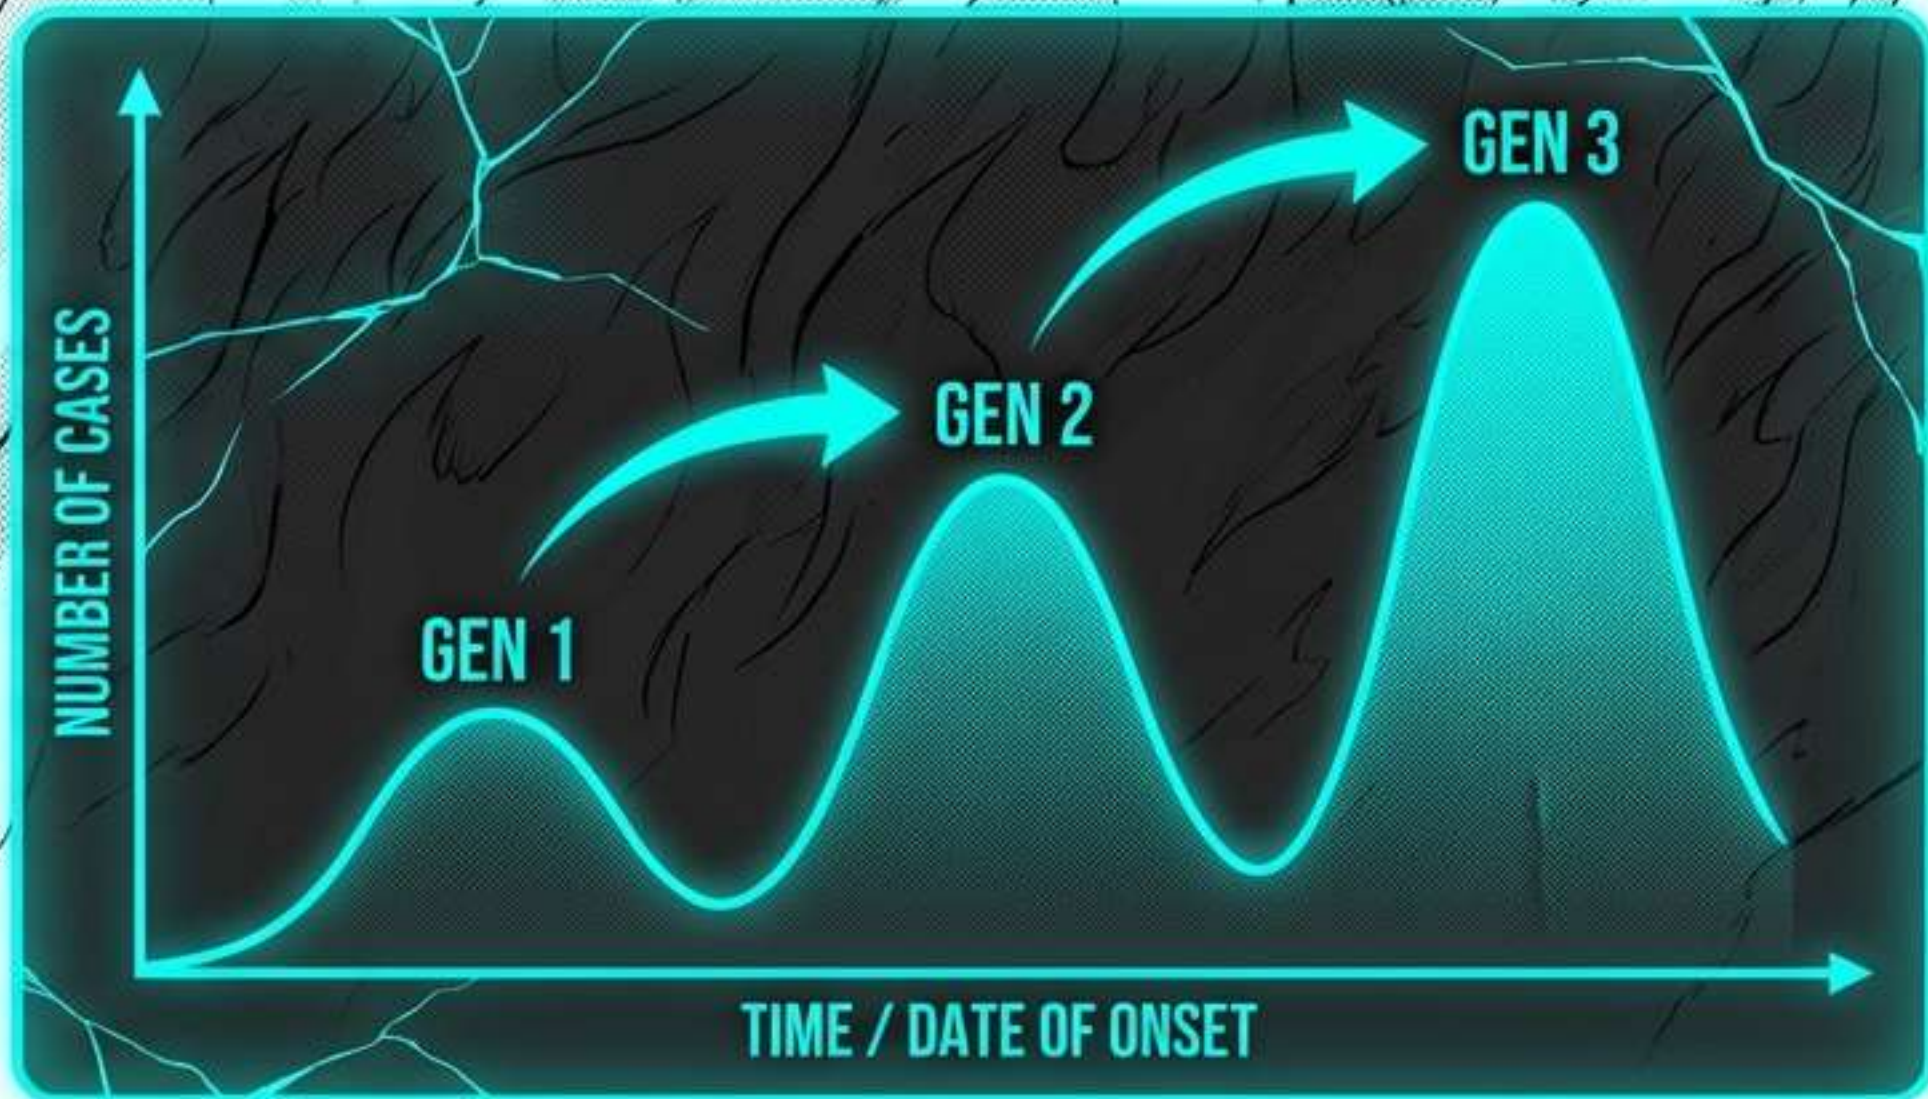

This isn't a single source anymore.
The victims are becoming the weapons.
It's spreading person-to-person.

Share Tech Mono

EXPOSURE: Serial transfer. Host to host.

EXAMPLE: Measles, Flu, or a zombie outbreak.

TACTICAL NOTE: Look for progressive waves separated by the incubation period.

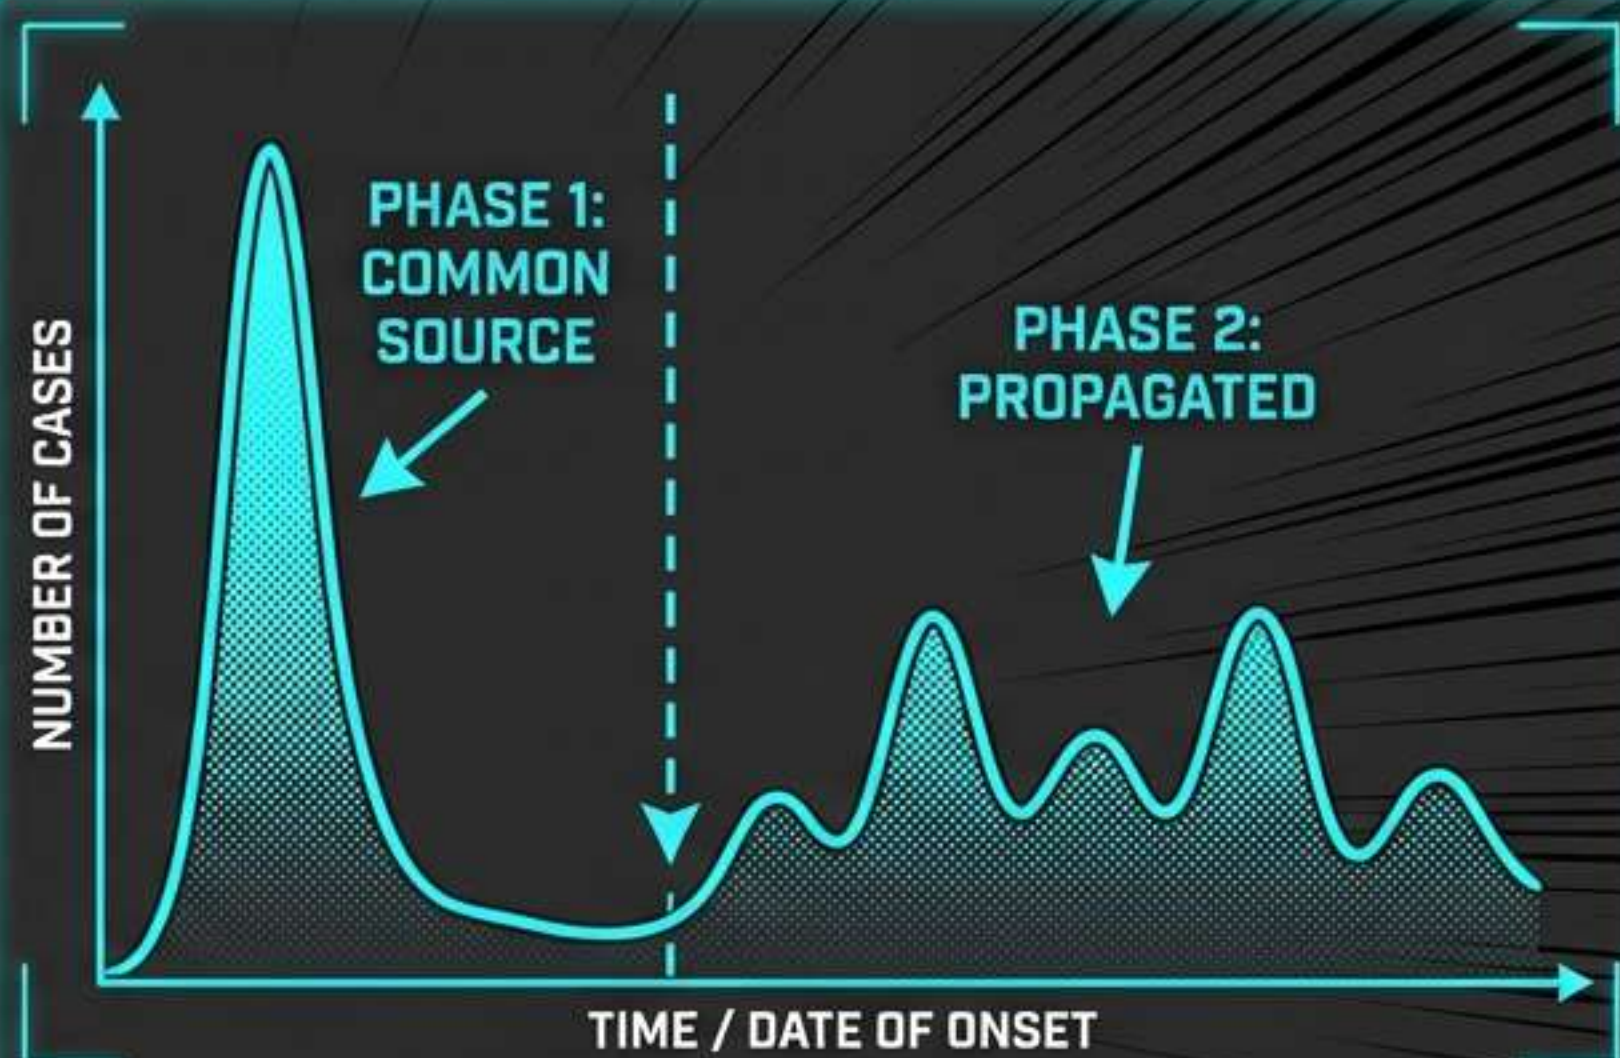

CLASS 5: MIXED EPIDEMIC

METAPHOR: THE AMBUSH

Don't get complacent. Sometimes the enemy combines tactics. It starts with a common source, then spreads through the ranks.

EXPOSURE: A single common source event followed by secondary person-to-person propagation.

EXAMPLE: Shigella at a music festival (source) spreading to families at home (propagated).

THE OUTLIER

See that straggler? The one who got sick before the main army? That's your "Index Case"—Patient Zero.

NUMBER OF CASES

INDEX CASE
(PATIENT ZERO)

DATE: [REDACTED] - DAY 01

MAIN OUTBREAK
CLUSTER

DATE: DAY 05 - START

TIME / DATE OF ONSET

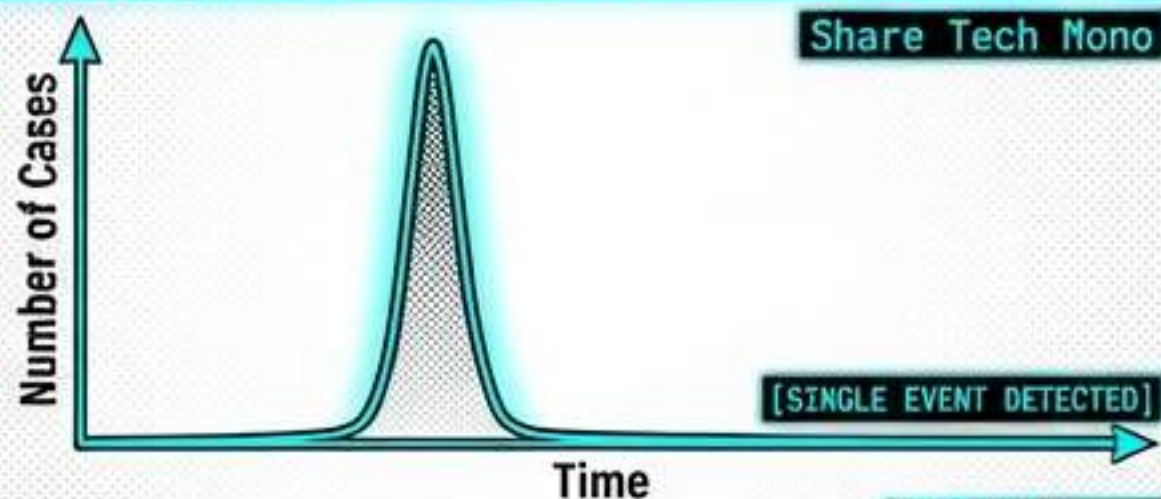

DEFINITION: A case that appears totally separate from the cluster.

SIGNIFICANCE: Could be the primary source of contamination, or an unrelated baseline case. Never ignore the outliers.

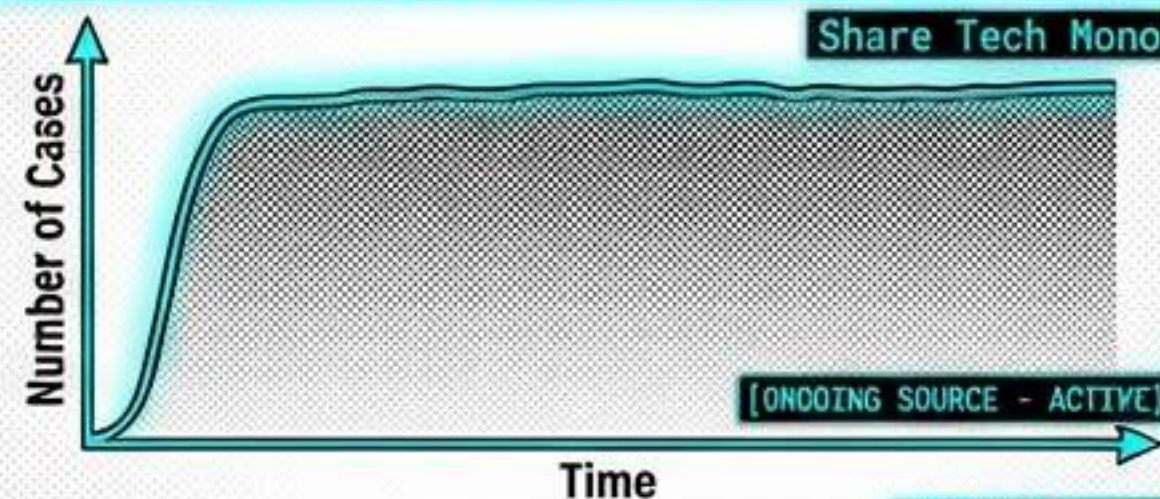

FIELD MANUAL: EPIDEMIC PATTERNS

Share Tech Mono: PATTERN RECOGNITION CHEAT SHEET

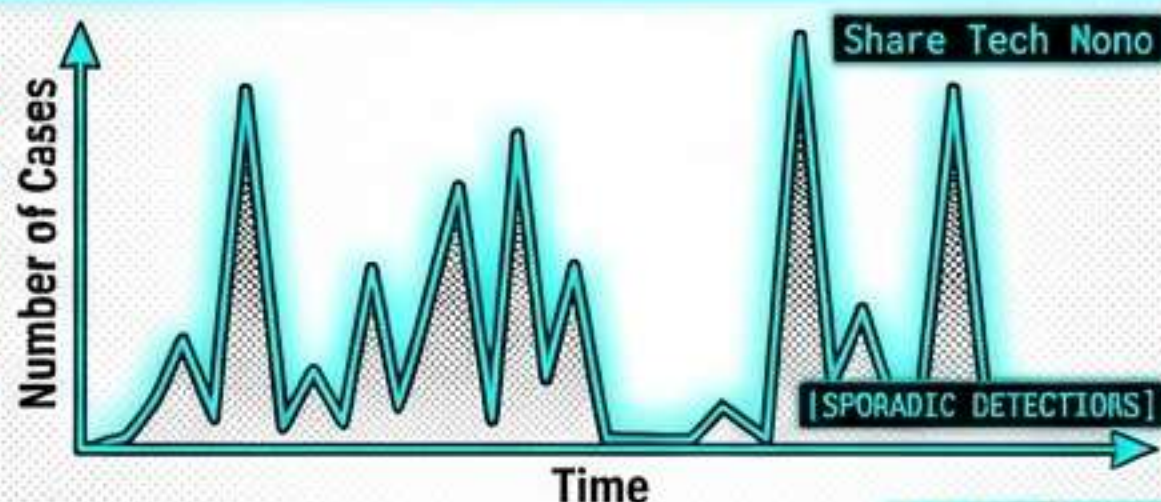

POINT SOURCE: Sharp Peak. Single Event.

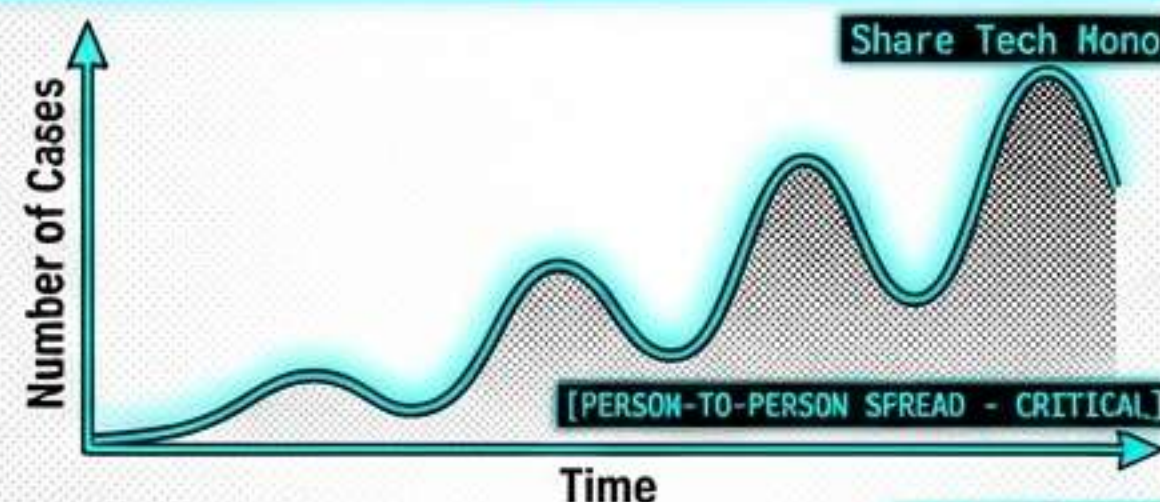

CONTINUOUS: Plateau. Ongoing Event.

INTERMITTENT: Jagged. Sporadic Event.

PROPAGATED: Growing Waves. Person-to-Person.

MEMORIZE THESE SHAPES. IN THE FIELD, PATTERN RECOGNITION IS THE DIFFERENCE BETWEEN CONTAINMENT AND CATASTROPHE.

DEPLOYMENT AUTHORIZED

Simulation complete.
You know how to read the
enemy's footprints now.
Get out there and flatten
those curves.
